

VoyagerGS 9590

Single-Line Laser Scanner

Honeywell's VoyagerGS™ 9590 hand-held, single-line laser scanner increases productivity by offering an aggressive solution for scanning all standard 1D bar codes.

As the newest addition to the industry-leading Voyager® series, the VoyagerGS 9590 features a new ergonomic design that maximizes comfort and reduces fatigue for customers desiring a trigger-activated, hand-held laser scanner. This new form factor makes the scanner ideal for a variety of applications, including retail point-of-sale, office automation and healthcare settings.

Optional integration of an RF EAS antenna allows retailers to save time and money by simultaneously deactivating EAS tags and decoding bar codes quickly.

The VoyagerGS ensures speed and accuracy by combining patented automatic infrared activation technology with an enhanced depth-of-field. This scanner also includes Honeywell's patented CodeGate® technology which easily completes data transmission with a single trigger pull.

The VoyagerGS 9591 is ideal for applications that require high-density scanning, such as electronics manufacturing. The 9591 delivers quick and accurate scanning of 1D bar codes as small as 3 mil.

The 9590 can be configured at no cost by using either the MetroSelect® Single-Line Configuration Guide or MetroSet®2 software via a RS232 or USB interface. The 9590 also has the ability to format bar code data to meet the specific requirements of host systems.

For presentation scanning, Honeywell offers a flexible stand with automatic in-stand detection technology.
